Project Executable Files

Date	15 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	3 Marks

Project Executable Files

This section contains all executable and deployable files for the Smart Lender project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Overview of the project's file and folder structure:

```
Smart-Lender-ML-Project/
│
├── 1. Brainstorming & Ideation/
├── 2. Requirement Analysis/
├── 3. Project Design Phase/
├── 4. Project Planning Phase/
├── 5. Project Development Phase/
│   ├── models/

```

Field	Details

Hosted URL	https://smart-lender-ml-project.onrender.com

Step 3: Deployment / Access Details

Login	reddykavitha9010@gmail.com (Google Sign-In)
Platform	Render
Repository	https://github.com/Kavitha-2108/Smart-Lender-ML-Project
Demo Video	https://drive.google.com/file/d/1fUuPdI_bI1_qs9hFIbvRaZO6vtQJEuC/view?usp=drive_link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Clone/download the project repository.
2. Open the project folder in Visual Studio Code.
3. Install the required dependencies using:

```
pip install -r requirements.txt
```

4. Run the Flask application:

```
python app.py
```

5. Open a web browser and visit the local URL or the deployed Render URL:

```
http://127.0.0.1:5000/
```

6. Sign in with Google.
7. Enter the required loan applicant details.
8. Click **Predict Loan** to view the loan approval result.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Accuracy depends on dataset	Train with larger dataset
2	Render free tier cold start	Wait a few seconds
3	No prediction history DB	Future MySQL/SQLite integration
