

Demonstration of Proposed Features

Date	15 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	1 Mark

Demonstration of Proposed Features

This document presents the features proposed during the planning phase of the Smart Lender – Loan Approval Prediction project and indicates whether each feature was successfully implemented and demonstrated. It provides evidence that the project objectives were achieved and the proposed solution was successfully delivered.

Feature Demonstration Table

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User-Friendly Loan Application Form	Allows users to enter loan applicant details through an intuitive web interface.	Implemented	Yes	Successfully demonstrated
2	Loan Approval Prediction	Predicts whether a loan application is Approved or Rejected using the XGBoost model.	Implemented	Yes	Accurate prediction results displayed
3	Input Validation	Validates user inputs before processing the prediction request.	Implemented	Yes	Prevents invalid or incomplete data submission
4	Result Display Page	Displays the prediction result (Loan Approved or Loan Rejected) with a clear interface.	Implemented	Yes	Successfully demonstrated
5	Machine Learning Model Integration	Integrates the trained XGBoost model with the Flask backend for real-time predictions.	Implemented	Yes	Model loaded and executed successfully
6	Cloud Deployment	Deploys the application on Render for online access through a web browser.	Implemented	Yes	Live application demonstrated successfully

Feature Implementation Summary

Item	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
